SUMMARY

Detail-oriented Full Stack Web Developer with over 8 months of hands-on experience in building dynamic and responsive web applications using the MERN stack. Proficient in developing and managing APIs on both frontend and backend, with a strong foundation in Node.js, Express.js, and MongoDB. Adept at employing modern web technologies to create user-centric interfaces and enhance overall user experience. Demonstrated ability to deliver high-quality projects, such as website clones, blog platforms, and personal portfolios. Seeking a paid internship to leverage technical skills and contribute to innovative web solutions while furthering professional development.

PROJECTS   Jan 2023 - Present

JobFinder Platform Website

Technologies Used: React.js, JavaScript, Node.js, Express.js, MongoDB

Developed a comprehensive job-finding platform designed to simplify the job search and recruitment process. The platform allows job seekers to browse and apply for jobs, while employers can easily post job openings and manage applications. Features include user authentication, role-based access, job posting and search functionality, and application tracking.

Blog Platform
Developed using HTML, CSS, JavaScript, React-Js
- Built a blog platform to share articles and tutorials on web development.
- Integrated a commenting system and search functionality.

Coder-Globe Website Clone
Developed using HTML, CSS, JavaScript
- Cloned the Coder-Globe website, demonstrating proficiency in replicating design and functionality.
- Ensured the clone was fully responsive and closely matched the original site.

EDUCATION

Bachelor of Business & Information Technology (BB&IT)   Apr 17, 2023 - APR 2027
Virtual University, 3rd Semester
- Relevant Coursework: Web Development, Database Management, Software Engineering
